Teresa Ribeiro, OSCE Representative on Freedom of the Media

Room: Shayir

13:30 – 14:30 **Lunch**

CAMC 2023, Bishkek

SESSION DESCRIPTIONS

<p>Stage Interview:</p> <p>At a crossroads: Why we need to safeguard media freedom now</p>	<p>Exploring the overarching theme of this conference, the OSCE Representative on Freedom of the Media Teresa Ribeiro and expert from the Advisory Group of Eminent Experts on Freedom of the Media Erica Marat will be interviewed live on stage. Why are we at a crossroads? What constitutes media freedom in these turbulent times? And what are the ways forward to guarantee secure societies and thriving democracies?</p>
<p>PANEL SESSIONS</p>	
<p>Session 1:</p> <p>Countering disinformation while safeguarding media freedom</p>	<p>Disinformation is plaguing our media and our societies, more than ever before. Countering it, however, is not an easy task. There is a delicate balance between security considerations and media freedom as a central pillar of our democratic societies. The session will explore how to tackle this international problem with a multi-sectoral approach, to increase awareness on and enhance resilience to disinformation.</p>

<p>Session 2: Freedom of expression in the age of algorithms and AI</p>	<p>The online information spaces is ever more shaped and arbitrated by platforms and digital technologies, including artificial intelligence (AI), which has a large impact on freedom of expression, media pluralism, democracy and comprehensive security. This panel will explore regional implications and identify policy responses to safeguard access to reliable, diverse, and public interest information in the digital age. The RFoM's SAIFE project, which puts a spotlight on the impact of AI on freedom of expression, will be place in the context of the Central Asia region.</p>
<p>Session 3: Privacy, protection of sources & digital safety of journalists</p>	<p>The fast-paced digital environment often poses challenges with regard to the privacy, confidentiality and safety of journalistic sources. These challenges include surveillance, threats to encryption and anonymity, and national security/other legislation with impact on the protection of journalistic sources. The session will focus on the legislative and practical issues with these challenges, as well as internet throttling and shutdowns.</p>
<p>Session 4: Mapping mechanisms and tools for the protection and safety of journalists in Central Asia</p>	<p>Throughout Central Asia region, journalists continue to face attacks, online threats and harassment, including of gendered nature, in connection to their work. This session will dive into regional trends, current challenges and persisting gaps, while mapping recent response efforts, including legislative measures, and other mechanisms and tools, for enhancing the protection and safety of journalists, and combatting impunity. The recently developed 'OSCE Guidance Tool for Monitoring Online Violence Against Female Journalists' will be presented and discussed.</p>
<p>Session 5: Hate speech</p>	<p>Hate speech can seriously undermine social cohesion, pluralism and peaceful co-existence in diverse societies. With the emergence of new digital technologies in the recent decades, it has become a viral phenomenon across the Central Asia region and beyond. While important to counter, legal responses should be carefully balanced and must not be misused to suppress open democratic debate on sensitive or controversial issues of public interest. This panel session will explore what constitutes the notion of hate speech in the region and where the line is drawn between "prohibited" and "allowed".</p>
<p>Session 6: Panel: Journalism Representation: Media self-regulation in the region</p>	<p>Looking into media self-regulation (MSR) in Central Asia region, its current status and ways forward. The speakers and participants will share experiences and best practices on how to strengthen the role of MSR bodies in upholding ethical standards in journalism in the digital age.</p>
<p>Session 7: Media and digital literacy initiatives in Central Asia</p>	<p>We live in an increasingly saturate and invasive information ecosystem. To be able to navigate, media and digital literacy are an essential constellation of skills – necessary for freedom of expression and access to information, and for building pluralistic and well-informed democratic societies. This session will explore inspiring and impactful regional projects and initiatives in Central Asia and internationally that contribute for citizens to better understand the role of media and think critically about the news they receive.</p>

OTHER SESSIONS AND SIDE-EVENTS	
<p>Masterclass: Spotlight on the impact of AI on freedom of expression</p>	<p>Building on the morning-session “Freedom of expression in the age of algorithms and AI”, this half-day SAIFE training will exemplify how the use of AI in information spaces affects free speech and media freedom; explore necessary safeguards to ensure healthy information and media ecosystems; and build capacity of state and non-state actors, in particular NHRIs and regulators. Renowned expert trainers will unfold key principles around transparency, accountability and democratic oversight, while participants will have an opportunity to assess and address human rights challenges stemming from the use of AI through scenario-based case studies.</p>
<p>Roundtable: Legal aspects of safety of journalists</p>	<p>This roundtable, which is part of the Safety of Journalists project of the Office of the OSCE Representative on Freedom of the Media, will focus on the use of legal instruments and procedures to harass, intimidate, hinder and stifle journalistic work, including by targeting their financial reserves. These practices range from the use of criminal and administrative law to the use of private law, sometimes also described as Strategic Lawsuits against Public Participation (SLAPP). Renowned experts will discuss this topic and develop concrete recommendations on how best to prevent these attacks on the legal safety of media.</p>
<p>Workshop: Shaping a practical toolkit for the safety of journalists</p>	<p>This workshop aims to gather innovative ideas and insights on how to shape and design a toolbox for the safety of journalists. This toolbox is being developed by the Office of the OSCE Representative on Freedom of the Media, aiming to provide an accessible set of guiding tools on how to improve the safety of journalists, combining good practice examples of national measures and recommendations for the OSCE participating States, as well as media outlets, journalists and civil society.</p>
MOVIE SCREENINGS	
<p>Made to Measure</p>	<p>Screening of the award-winning interactive storytelling documentary ‘Made to Measure’ by Laokoon, co-produced by the Office of the OSCE Representative on Freedom of the Media. The film experiment creates a doppelganger of a person based solely on their online data, illustrating how a fraction of a person’s data is sufficient to identify their interests, intimate personality traits, and opinions, and to predict – or even manipulate – their thoughts and behavior. The documentary screening will be followed by a Q&A session.</p>
